

Date: 8. October 2009

Declaration with reference to EC regulation no. 1907/2006 regarding Registration, Evaluation, Authorisation and Restriction of Chemical Materials (REACH)

In the REACH process Remy Automotive Hungary LLC. is concerned as a producer of articles and downstream user of substances and preparations. Responsibilities arising from the manufacture of substances/chemicals for pre-registration and registration are not relevant to us.

The registration (Article 7.1 REACH) of substances in articles is obligatory for an article producer or importer only if the substances are intended to be released from the article during normal and reasonably foreseeable conditions of use.

Our products do not contain substances which are intended to be released into the environment, therefore registration obligation has no relevance to us.

As regards our sub-suppliers, Remy Automotive Hungary LLC has taken steps to secure our supply chain and requested information on their intentions and advised them about the requirements regarding REACH compliance.

Consequently it is expected that manufacturers/importers have pre-registered all applicable substances which can be found in our products by the 1st of December, 2008. We do not foresee the need to interrupt any of our production processes or supplies as a consequence of REACH regulation. Wherever necessary we will inform you of modifications on our products which may become necessary in order to comply with the REACH Regulation. Also, within the scope of our business relationship we will inform you of any impact this may have on the delivery or quality of products we supply to you.

In relation to the list of so-called "substances of very high concern" (SVHC) we can declare that none of the currently listed substances (http://echa.europa.eu/chem_data/candidate_list_table_en.asp) are used in Remy production processes or contained in Remy products above the limit concentration of 0.1 w/w %.

We remain of course at your complete disposal for any further information or clarification you may require.

With kind regards,

Elemer Kovacs

EHS&S Leader
